

**Fortified Health Security is healthcare's recognized leader in cybersecurity – protecting patient data and reducing risk throughout the Fortified healthcare ecosystem.**

## **Healthcare's Cybersecurity Partner<sup>®</sup>**

### **We're a 100% healthcare-focused managed security service provider.**

We recognize healthcare organizations have unique cybersecurity challenges compared to other industries. With zero downtime requirements for critical systems, a cybersecurity event can have a significant impact on patient care.

### **We've built a dynamic ecosystem.**

Your patient data is better protected through collective intelligence and best practices. When we identify threats in one hospital, we leverage this healthcare specific threat intelligence to further strengthen all members across our ecosystem.

### **We know how to reduce risk.**

With our award-winning processes combined with our team's extensive experience in healthcare systems, our clients learn we're all-in when it comes to quickly and cost effectively improving their cybersecurity maturity. Let us become your proven partner on this journey.

### **We strike the right balance of people, process and technology.**

Through our multi-faceted approach, *people* take precedence – whether recruiting and educating employees or choosing the right partner. But we also closely scrutinize and improve the *processes* for backups, incident response, breach notification, and disaster recovery; while confirming the right *technology* is identified, implemented and purpose-built to your needs.

# Fortified's Three Pillars of Service

As cyberattacks across healthcare get more sophisticated, fundamental security practices and procedures remain the best defense. Executing those fundamentals to reduce risk in a cost-effective way is achievable with the right partner.

We bring an exceptionally high degree of expertise during our high-touch engagements and managed services. These relationships result in actionable information, and partnership-level responsiveness.

We offer the following purpose-built strategies, services and tools for healthcare to support your organization's cybersecurity journey:

## Advisory Services

*Developing strategy...  
Building security programs...*

- Security Risk Assessment (HIPAA, NIST CSF)
- HITRUST Certification
- Virtual Information Security Program (VISP)
- Virtual Information Security Officer (VISO)
- Third Party Risk Management
- Telemedicine Assessment
- Work from Home Assessment
- CIS Gap Analysis

## Healthcare Security Operations Center (SOC)

*Monitoring threats...  
Guiding remediation...*

- Security Information and Event Management (SIEM)
- Data Loss Prevention (DLP)
- Connected Medical Device Security Program (IoT/IoMT)
- User Awareness, Education, & Managed Phishing
- Managed Detection & Response (EDR/MDR/XDR)
- Multi-factor Authentication
- Custom SOC Services

## Threat Assessment & Intelligence Services

*Identifying vulnerabilities...  
Mitigating risk...*

- Vulnerability Threat Management (VTM)
- Vulnerability Assessment
- Penetration Testing
- Dark Web Monitoring
- Incident Response
- Tools Rationalization
- Cloud Security

**We look forward to speaking about your cybersecurity needs.**
